SKILLS

Next.js

React

TypeScript

.NET

AWS

REST APIs

SQL

Node.js

Troubleshooting

Drive

Optimization

Adaptability

Collaboration

Innovation

INTERESTS

AI

Design

DevOps

Databases

Architecture

Biomedicine

Optimization

ACCOMPLISHMENTS

Top-performing contributor in sprint ticket completion, consistently completing work on time

Optimized AWS infrastructure, cutting costs by over 50%

Self-taught 8+ languages and frameworks in a fast paced startup

CERTIFICATES

- Introduction to Generative Artificial Intelligence

AWARDS

- IEEE Night Second Place Design Project Award

SIDE PROJECTS

What's for Dinner - AI meal planner generating customized meal plans and waste reducing grocery lists

Perfect Bloom - AI plant care app for image-based plant identification, watering schedules, and disease diagnosis

TESTIMONIALS

"Abigayle played a key role in our technical development, demonstrating strong full-stack expertise, professionalism, and work ethic." - **Sid Eskandari, CEO, HYKE**

SUMMARY

Creative **Full Stack Developer** with a **Computer Engineering** background and expertise in **Next.js, TypeScript, React, Node.js** and **.NET**. Passionate about design and intuitive user experiences. Committed to going above and beyond while embracing lifelong learning.

With **Lead Full Stack Developer** experience, I collaborate closely with product, design, and QA to deliver user-focused features and product improvements. Experience working on **high-traffic applications**, I ensure **stability, performance** and **optimization** within agile sprint cycles. I prioritize clean, efficient code while maintaining high delivery standards in **fast-paced**, high-pressure environments

EXPERIENCE

Platform Developer

OPENSOURCE, 04/2025 - Present

- **Tech Stack:** Next.js, React, TypeScript, Node.js, DynamoDB, WebSockets
- **Responsibilities:**
 - Developed full-stack features in agile 2-week sprints
 - Built and shipped AI-powered features using AWS Bedrock, Lambda functions and SDK integrations
 - Collaborated with designers, QA, and product teams to deliver production-ready features on schedule
 - Investigated production issues with AWS CloudWatch logs and efficiently resolved hotfixes to maintain a stable client-facing platform

Software Developer

HYKE, 06/2021 - 01/2025

- **Tech Stack:** React, Vue, Node.js, .NET, SQL, AWS, Flutter, Quasar, TailwindCSS, C#, Postman, Azure Data Studio
- **Responsibilities:**
 - Designed and implemented full-stack features for web and mobile platforms
 - Integrated POS systems for client transactions and user workflows
 - Managed AWS infrastructure, improving performance and optimizing costs

A6E Customer Applications Co-op

Nokia, 09/2019 - 12/2019

- **Tech Stack:** NPS, Linux, SQL
- **Responsibilities:**
 - Provided tiered technical support by diagnosing and resolving issues within Nokia's Network Management Platform.
 - Earned outstanding work review for problem-solving and technical support.

EDUCATION

Bachelor of Engineering, Computer Engineering

Memorial University of Newfoundland, 2017-2022

- **GPA:** 3.6/4 (80% avg.)
- **Skills:** C++, JavaScript, OOP, algorithms, microprocessors, data structures, design project
